

I am writing in to address the changing FM radio to LPFM. I am a subscriber to the Christian Radio station K-Love and have been for the last 4 years. This station has been so important to me that I have been willing give financial support for those years. As a person who spends a significant amount of time this radio station has been invaluable to me personally. Being able to listen to Christian Radio provides me with support and serenity that regular radio programming does not. It provides safe listening for children that is definately not available with secular radio where the DJ's discuss sex, drugs and alcohol use and other inapproiate statments and topics which are offensive to me as an adult and definatly not appropriate for children to hear. As I drive around my area I see many cars that have the K-love bumper sticker and many people in my church and community discuss the benefits of having the choice to listen to Christian radio, if your proposal goes through we will be stuck with John Boy and Billy, Lex and Terry and Howard Stern. Please seriously consider the approximately three million people who will be effected by this transition to LPFM and how it will limit comsumer choice.
